Question 1

A /Read the following text and then answer the questions:

Robots are coming for our jobs ...

I was talking to some friends yesterday about robots. Everyone thinks that there won't be any jobs le_ for us in the future because robots will do all our jobs instead.

'They're coming for our jobs,' one friend said! But I don't agree with this idea and I don't think there's any need to worry about the future.

Robots aren't coming for our jobs. They're already doing them! They do a lot of the jobs that people used to do in the past. For example, robots make cars in factories and milk cows on farms. This doesn't mean that people can't find jobs any more. It just means that people can do more interesting jobs now.

In the future, it's true that robots will do more jobs. For example, they will do housework and drive cars. But this means that we will have time to learn new things and do different jobs. Also, robots will never have ideas or feelings, so there are some jobs that they will never do. For example, a

robot will never take care of a sick person like a nurse can and a robot

will never understand what a worried child needs in the way a teacher can.

1 /What does the author's friend believe about robots and jobs?

The friend believes that robots will take over all human jobs in the future.

2 / What jobs are robots already doing, according to the passage?

Robots are already making cars in factories and milking cows on farms.

3 / How does the author feel about robots taking over jobs?

The author is not worried and believes that robots taking over certain jobs will allow people to do more interesting jobs.

4 /What does "worry" mean in the sentence "I don't think there's any need to worry about the future"?

In this context, "worry" means to feel anxious or concerned about something.

5 / Explain the phrase "robots are coming for our jobs." What does it imply?

This phrase implies that robots are starting to take over tasks and jobs traditionally done by humans, potentially leading to fewer job opportunities for people.

6 /Explain the phrase "robots are coming for our jobs." What does it imply?

This phrase implies that robots are starting to take over tasks and jobs traditionally done by humans, potentially leading to fewer job opportunities for people.
